Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the prior arts of record fail to anticipate or render obvious the following recited features: a pulse generator coupled to said data processor capable of generating said first compensation pulse having said amplitude and said polarity determined by said data processor, wherein said first baseband combiner receives said first compensation pulse and combines said first compensation pulse with said first composite baseband chip sequence during a chip time slot corresponding to said first peak amplitude as recited in

claims 1 and 9. Determining an amplitude and a polarity of a first compensation pulse associated with the first peak amplitude and generating the first compensation pulse having the determined amplitude and polarity and combining the first compensation pulse with the first composite baseband chip sequence during a chip time slot corresponding to the first peak amplitude as recited in claim 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
